

Write each amount using a different unit.

$0.4 \text{ l} = \square \text{ ml}$

$600 \text{ ml} = \square \text{ l}$

3 $0.7 \text{ l} = \square \text{ ml}$

8 $900 \text{ ml} = \square \text{ l}$

4 $500 \text{ ml} = \square \text{ l}$

9 $2300 \text{ ml} = \square \text{ l}$

5 $3 \text{ l} = \square \text{ ml}$

10 $3.9 \text{ l} = \square \text{ ml}$

6 $2000 \text{ l} = \square \text{ l}$

11 $1100 \text{ ml} = \square \text{ l}$

7 $0.8 \text{ l} = \square \text{ ml}$

12 $2.7 \text{ l} = \square \text{ ml}$

Solve these problems.

- 13 One shampoo bottle contains 400 ml and another contains 0.3 l. Which holds more and by how much?
- 14 Sam puts 0.6 l of juice and 200 ml of water into a jug. How many millilitres of drink is in the jug now?
- 15 A cola bottle holds 800 ml. Roo drinks 0.4 l of it before lunch and 200 ml after lunch. How much does she have left?

I am confident with comparing litre and millilitre capacities.
