

Dear Detective

2 Dear Detective,
9 Last week, several of our penguins escaped
17 from their enclosure. We need your help to
22 discover how they managed it.
30 The only way into the enclosure is through
40 a door which is kept locked at all times. The
48 entire space is surrounded by a fence which
57 is double the height that a penguin can jump.
67 There is no way to dig under the fence either.
75 Despite all of this, seven penguins were able
83 to enjoy an evening walking around the park
90 before they were discovered by a surprised
91 keeper.
99 We need help solving this mystery before they
102 do it again.
104 Yours faithfully,
106 Z Keeper.

Quick Questions

1. **Last week, several of our penguins escaped from their enclosure.**
Write down another word that means the same as 'enclosure'.
Accept any sensible substitution, such as cage, home or housing.
2. Who wrote this letter?
Z Keeper wrote this letter.
3. Describe the penguins' enclosure using 15 words or fewer.
Accept any sensible summary, such as: It has a locked door and a tall fence that the penguins can't dig under.
4. Do you think that the penguins will escape again? Explain your answer.
Accept any sensible answer, such as: I think that the penguins will escape again because nobody has discovered how they did it so they could do the same again.
