

# Weight in grams and kilograms

Write the most likely weight of each creature.

1

10g 200g 2kg

3

1kg 2g 20g

5

20g 20kg 8kg

2

2g 10kg 100kg

4

3g 700g 10kg

6

1g 1kg 2kg

Write each amount in kilograms.

7

1250g

9

1000g

11

500g

13

2500g

8

2000g

10

750g

12

1500g

14

2750g

Think of an animal. Discuss with your partner what unit you would use to weigh it. Repeat this for a different animal.

I am confident with choosing appropriate units of weight and converting between grams and kilograms.
