

Adding 3-digit numbers

1. $234 + 513 = \square$

2. $736 + 125 = \square$

3. $391 + 527 = \square$

4. $764 + 235 = \square$

5. $256 + 381 = \square$

6. $347 + 349 = \square$

7. $134 + 23 + 341 = \square$

8. $254 + 323 + 62 = \square$

9. $325 + 187 = \square$

10. $474 + 268 = \square$

11. $184 + 539 = \square$

12. $678 + 76 = \square$

13. $236 + 427 = \square$

14. $356 + 853 = \square$

15. $844 + 356 = \square$

16. $547 + 686 = \square$

17. Find different ways of making this calculation correct: $\square 58 + 1\square 6 = \square 24$

Adding 3-digit numbers

1. $234 + 513 = 747$

2. $736 + 125 = 861$

3. $391 + 527 = 918$

4. $764 + 235 = 999$

5. $256 + 381 = 637$

6. $347 + 349 = 696$

7. $134 + 23 + 341 = 498$

8. $254 + 323 + 62 = 639$

9. $325 + 187 = 512$

10. $474 + 268 = 742$

11. $184 + 539 = 723$

12. $678 + 76 = 754$

13. $236 + 427 = 663$

14. $356 + 853 = 1209$

15. $844 + 356 = 1200$

16. $547 + 686 = 1233$

17. Find different ways of making this calculation

correct: $\square 58 + 1\square 6 = \square 24$

For example, $158 + 166 = 324$, $258 + 166 = 424$,
 $358 + 166 = 524$, $758 + 166 = 924$...
