

Please help me build different number pyramids.

Choose 4 numbers and write them in the bottom bricks. Add the numbers together and write the total in the brick above. Continue till the top brick is filled. Take the same 4 numbers and write them in a different order in the bottom bricks on the next number pyramid.

Does the top brick number change?

Why do you think the number at the top changes?

If you change the order of the bottom numbers what happens to the top brick number?

What is your highest top brick number?

What is your lowest top brick number?

Choose even numbers for the bottom bricks. What happens to the top brick?

Choose odd numbers for the bottom bricks. What happens to the top brick?
